den, Head Cosch Averill Harriman and Assistant Cosch Jim Rodgers. On their arrival in England the coaching staff will spend three weeks examining the rowing system in vogue there. They will devote an equal amount of time to the systems in operation at Oxford and Cambridge, and as both these crews will be in the midst of their preparation for their annual race the visit should prove instructive. One of the noveltles of the visit will include the seating of Capt. Snowden in an English boat alongside English rowers. This, it is expected, will be of direct benefit in the acquisition of the details of the stroke. Immediately upon their return from England the trio will start the Yale crew candidates at work.

COBB WON'T GET A 3-YEAR CONTRACT FROM DETROIT CLUB

President Navin Afraid Ty Might Meet With Accident That Would Impair Speed.

DETROIT, Jan. 3.-Tyrus Raymond Cobb will not get a three-year contract. President Frank Navin of the Detroit Baseball Club made that very positive statement. Just why Frank is averse to signing up the Georgia Peach for three years was not explained.

It is not likely that Cobb will even start to slip for three years, but there is always the possibility of an accident speed and dash. Certainly the Southerner will not have become aged or decrep! passed him twenty-sixth birthday and. as he takes good care of himelf, ought to last for a long time yet. What seems a more likely explanation

of the Detroit club's preference for a one-year contract is that Mr. Navin may find it more convenient to gwe Tyrus a very large sum for a single season and then taper off than to book him for the average up the same in the long run. very anxious to claim the honor of being the highest paid man who ever played sort of distinction that he much covers Having achieved this ambition to reach a mark that nopody else had touched in the past and that nobody would be be willing to accept somewhat less for the future years of his service.

Mr. Navin will not announce what he is to pay Cobb for 1913 in case the Peach
